

## The FineTech Concept: Your Computer Furniture Shouldn't Look Like Computer Furniture

## The Desk

Choose either the traditional or the contemporary style, each meticulously hand-constructed of only the finest grade solid oak. Hand rubbed to a beautiful finish, America's favorite woodwork stands up to the most discriminating tastes in fine furniture. This is not an imitation, this is solid oak. You can see and feel the remarkable difference. Either style desk measures  $26'' \times 47''$ 

with a desk top height of 30" adjustable to 31½" with levelers. The desk can be dropped to 27" by removing the feet to accommodate non-detachable keyboard/computer systems. From any angle, it is fine furniture.

Shown in Traditional series #100. Dark Oak finish.

## The Printer Stand

The solid oak printer stand beautifully complements your personal computer furniture. It is specially designed to accommodate virtually all printers, including KSR and RO units, with capabilities for both front and rear paper feeders. The stand is a full 30" high with removable casters, (this allows

stand to sit level with desk height). Carefully engineered design allows for ample cable feed to your printer, as well as maximum air flow.

Shown in Contemporary series #225. Golden Oak finish.

## The Shelf System

The removable, adjustable shelf system offers spacious shelves on both sides of the monitor platform in a beautifully constructed design that gives you 34"×45½"×11" in which to store software, books, disks, or anything else you need at your

fingertips. The fact that this is a removable component makes a convenient large and beautiful desk top.

Shown in Traditional series #150.

## The Keyboard Drawer

The keyboard drawer option works with personal computers that have detachable keyboards and those units where the keyboard is not over 4" tall. With the drawer option the keyboard can be placed at optimum height, while keeping desk height at the

most comfortable level. (Desk height 30", keyboard height 26".) The sliding drawer secures your keyboard out of sight when not in use.

Shown in Contemporary series #260.

### The Monitor Platform

A removable platform in the same beautiful finish as your desk fits neatly onto the desk top and places the monitor at the most comfortable viewing position. The platform is adjustable to eliminate distracting glare. A

larger platform allows for storage of smaller disk drive units. The platform accommodates virtually all monitors.

Shown in Traditional series #175.

# What Makes Each Piece Of FineTech Computer Furniture So Uncommonly Beautiful Is What Each Piece Has In Common.

What does each piece in the Woodbury Series golden oak (as in the contemporary), or have in common? Adaptability. To Atari. To natural finish. Each piece is shipped to require Commodore, IBM, Texas Instruments, Apple. only a screwdriver and wrench for quick assem-Vector Graphic. Intertec. Zenith. Xerox. Wang. bly. Each piece is a component, allowing you to add to your furniture set as your Osborne. Continuity. Each computer system expands.
